

KORAL LINE K951E

TYPE	Warewasher
LINE	KORAL LINE
BASKET	600x670
SIZE	775x810x1360h

The **KORAL** line is distinguished by its wide range of models suitable for any situation. Through the electronic card, the control system provides great customisation options based on your needs, allowing you to accurately adjust any parameter and ensure optimum washing results. The innovative UNIKO tempered glass touch screen display makes any operation simple and intuitive, from the choice of most suitable wash cycle to its progress control, as well as constantly monitoring the dishwasher state with ease. The large variety of wash cycles makes the dishwasher customisable according to your needs. Constant self-diagnosis allows you to minimise machine downtime, promptly warning the technician through the Wi-Fi IKLOUD control system that gives the possibility of remotely changing the dishwasher parameters and resolving the situation in real-time.

Thanks to its dimensions, the **K951E** model can be considered as both large dishwasher and as warewasher. In fact, its basket can wash 26 dishes per cycle, GN1/1 gastronorm trays and 600x400 dough trays and objects measuring up to 575x645x445(h)mm with a maximum productivity of 30 baskets/hour (780 dishes/hour). The practical work height facilitates basket loading while the **double insulated walls** improve thermal-acoustic insulation. The **rounded moulded tank with integral filters** ensures maximum hygiene and perfect draining.

The electronic control allows you to manage various parameters to give you an absolute customisation level and the continuous **self-diagnosis** allows you to **minimise machine downtime**, suggesting some operations that need to be verified. The **self-cleaning cycle** at the end of the day cleans the wash tank and empties the hot water from the boiler, preventing limestone from building up inside. The standard **double peristaltic electric rinse-aid and detergent dispenser** ensures the best result from each wash cycle with great savings thanks to the precise dosage managed by the electronic card; whereas, the moulded washing and rinsing arms ensure great reliability and durability. The **Thermo-stop** function checks that washing and rinsing begin only when the desired temperature is reached. The bodywork is made entirely of **AISI 304**
